Technology + Solutions

- + Home Automation
- + Smart Lighting
- + Smart Energy
- + Smart Services

**Kinektch**  
Smart Homes

Welcome to the  
**Home of the Future.**

A smartphone is shown at an angle, displaying a smart home control application. The screen features a floor plan with rooms labeled 'Home', 'Bedroom', and 'Bathroom'. Below the floor plan, there are several circular icons for controlling different aspects of the home, such as 'WiFi', 'Light', and 'Fan'. The background is dark, and the phone's screen is the primary source of light and information.

A Kinektech Smart Home integrates all of the technology in your life into a complete experience. We provide clever solutions that are a perfect upgrade for your new or pre-existing home and are easy for your whole family to enjoy.

With one touch, create the perfect atmosphere for any occasion by dimming the lights, closing window blinds and setting a comfortable temperature.

It doesn't end there; your home can also be configured to respond to your needs without touching anything at all.

The possibilities are truly limitless.

# Home Automation

Simplify everyday tasks with automations that are personalised to your requirements.

Home automation provides the ability to control multiple devices and appliances from a simple interface as well as using your voice naturally. Almost anything can be configured to be automated within your home including lighting, heating and cooling, door locks, security systems, personal appliances and much more.

Some of the many benefits to automating your home include:

- Opening window blinds in the morning as you wake up to start your day.
- Having the perfect cup of coffee waiting for you while you get ready.
- Regulating home temperature based on forecasts or occupancy presence.
- Securing the house door locks and security systems when you go to bed.

# Smart Lighting

Smart lighting brings elegance, convenience, and energy efficiency to your whole home.

Smart lighting allows you to influence the ambiance of your home and complement the aesthetics of its decor. You can turn on or off an entire room or multiple rooms from a single switch, set dimming to the level you desire from your smart phone or by using your voice in a natural way.

Upgrade your existing lighting today to experience:

- The lights in your home turn on automatically to welcome you.
- Use motion sensors to provide hands-free illumination in hallways and cupboards.
- Have the lights turn off automatically when a room is unoccupied.
- Give the appearance of being home even when you're away.

# Smart Energy

Master your homes energy impact and discover the ultimate in power management.

Are you looking for ways to save money on rising energy costs? With our range of Smart Home solutions, you will receive real-time information on the energy consumption from lights and appliances and get a better understanding of what is costing you the most to run day to day in your home.

This feature is included standard in our Smart Home products range:

- Gain valuable insight on costly power-hungry appliances in your home.
- Automatically schedule appliances to switch on or off when you need them.
- Control appliances from the convenience of your smart phone or voice control.
- Access and control your home's power points remotely anytime and anywhere.

# Smart Services

Your Smart Home can be everything you dream it to be. That's what we are here for.

Kinektech offers the best selection of Smart Home products and we also offer a personalised one-to-one consultation service to assist you in creating your dream Smart Home.

Regardless of what stage you are up to with your new or existing home, we will deliver truly magical results that you and your family will love and use every day.

Thank you for considering **Kinektech** for all of your Smart Home needs.
